## Product advantages

- High initial adhesion (tack)
- High shear strength
- Good resistance to ageing and weathering
- Suitable for bonding of low surface energy surfaces like Polyethylene and Polypropylene
- DuploCOLL® AP with its compressible foam carrier is better in compensating component tolerances than hard foamed systems.
- Due to the black colour the tape is almost invisible in the application.
- Good sealing properties due to the closed cell structure of the PE foam
- Good processability due to dimensionally stable construction

## Main application fields

- Permanent bonding of plastic – plastic add-on parts in the automotive industry
